

Overview

Since the launch of Healthy Tri-County (www.healthytricity.com) in January 2017, our long-term aspirational goal has remained the same: to improve the health and well-being of every person and community within the Tri-County region. **The Community Resource Hub** is intended to provide support to any individual in Berkeley, Charleston or Dorchester county seeking access to local, public health resources (agencies, hospitals, clinics and other online health hubs) that advocate, educate or provide healthcare services supportive of the goals and recommendations detailed in [Tri-County Health Improvement Plan 2018-2023](#).

Community Resource Guide

The Community Resource Guide was developed to help users navigate our Community Resource Hub and to provide an easy way for user to printoff a summary list featuring a collection of recommended resources from each of the following prioritized health topics and categories as ascribed by the core partners of Healthy Tri-County (MUSC Health, Roper St. Francis Healthcare, and Trident United Way) and its member participants:

- **Access to Care** – refers to reducing individuals' barriers to receiving comprehensive quality health care. These include gaining entry into a health care system (usually through insurance); accessing a location where needed health care services are provided (geographic availability); and finding a health provider that the patient trusts and can communicate with (personal relationship)."
 -  **Free/Sliding Scale Dental Clinics** –
 -  **Free/Sliding Scale Medical Clinics** –
 -  **Insurance Information** –
 -  **Public Transport/Ride Share** –
 -  **Support Services** –
- **Behavioral Health** – refers to both substance use and mental health disorder.
